Class List and Description

A. Public Safety Bomb Technician & Technology

Describes the role a Public Safety Bomb Technician plays in our community and show all the different kinds of technology in this profession.

B. Careers in Aviation – Thursday, April 11

Steam as a tool to foster entrepreneurship, problem-solving, using critical thinking, and career paths to Aviation.

B. FMCT Theatre Workshop – Friday, April 12

We will lead students through theatre games to help develop skills like expression, projection, collaboration, and confidence-building. Students will participate in hands-on exercises that will be fun.

C. Manufacture a Window with Marvin

Have you ever wondered how manufacturing works? Join Marvin as we discuss how we go about making as many quality windows as we can in a day for people’s homes. There are lots of jobs that make this possible, from engineers to production workers, everyone has a role to play.

D. Minecraft Hour of Code

Play Minecraft and learn at the same time! The Minecraft Hour of Code class lets students build and explore within a Minecraft-based module! Microsoft professionals will help students write code that instructs their characters to execute commands and overcome in-game obstacles, fostering a basic understanding of code.
